

Real Red Player

Documentation

How to use

After installation, open Real Red Player. The Splash Screen appears.

Then you will see this window.

This is the window. Now click on Open button. The open dialog appears. Select the appropriate file type (expand the file type menu to see) and click Open.

Then the Play and Stop buttons get activated. Click on Play to start the video.

Click on Pause to pause the video.

Click on Stop to stop the video. Doing so will also unload the media file from the player.

You can use the Slider to navigate between times.

The position of the video is displayed beside the slider.

The window is responsive. It will display same when maximized.
